

### 4 mm grout

**Function**

The Balance Pro BP400 support line has been designed for the installation of any type of flooring on any surface, allowing inspection of the various systems beneath, without needing to demolish anything. The head has 4 tabs 4 mm thick that allows the installation both of slabs or joist for decking across the tabs. It can be installed also with Impertek's Easy Rail joist that fits firmly to the head creating a single part with the support.

Thanks to the innovative system of adjustment from above, the perfect final levelling of the floor with millimetric height adjustment is obtained by using the TopKey key, in addition to the self-levelling capacity of the head which adapts to inclinations of the supporting surface of up to 5%.

The GBP ring nut, hooked to the base by means of special fins with slots, offers the possibility of satisfying a considerable height excursion of the support, suitable for raised floors of medium elevation with a particularly irregular support surface.

To complete the absolute versatility of the system, if it is necessary to compensate for the self-levelling effect of the head, a rocker block ring is also supplied to be fitted on the head.

The included 2 mm thick rubber leveller, to be applied over the head, reduces the foot-traffic noise by reducing contact between the tile and the head.

**Compatibility** Easy Rail and T-Rail joists

**Range** h 125-225

**Performance**

The materials used to produce Balance Pro products have good resistance to acidic, basic solutions and atmospheric agents such as bad weather, air exposure, UV exposure.

Reaction to fire classification of the pedestal and of the anti-shock rubber shim: E(fl).

Their mechanical features stay the same over time.

**Operating temperature** -40°C; +75°C

<b>Included accessories:</b>	Rocker block Rotation block	<b>Recycled product</b>	Yes for PP T 20% No for TPE
