

- Function** The Wall Clip is used to prevent direct contact between the tiles and any perimeter walls, in raised floors for outdoors, thus creating a constant distance between the tiles and the walls.
 The Wall Clip is made of stainless steel.
 Thanks to the particular shape of its profile, it absorbs any longitudinal dilation and small movements of the tiles.
 The central hole offers an effective seat for the fins of the heads of the supports.
- Compatibility** Only for flat heads or heads with fins 2 or 4 mm thick.
- Range** Ø 120 e Ø 150
- Performance** Stainless steel has excellent mechanical properties, and thanks to its exceptional resistance to corrosion caused by weathering, it does not require any maintenance, especially in case of high humidity and very salty water.

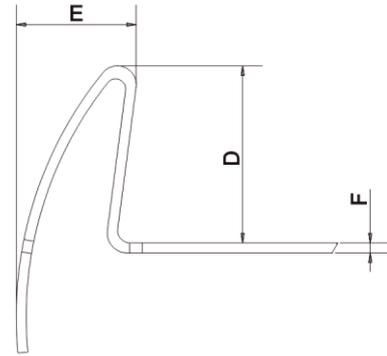

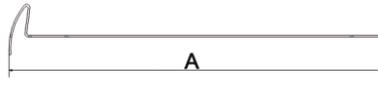

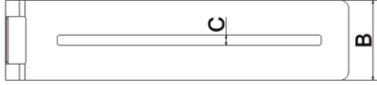

Operating temperature -

Included accessories:	-	Recycled product	No
Optional accessories:	-	Recyclable product	Yes
	-	Material	AISI 316
	-

Additional information

Using the Wall Clip results in an increase in the height of the support equal to the thickness of the Clip itself.
 In case double Wall Clips are used, arranged at a 90° angle under a corner tile, the height of the support increases by 16/10 mm in total.

If not otherwise indicated, all measurements are expressed in millimetres.
