

Collomixer XQ2 without paddle

The Efficient

The new XQ2 is your compact, single-speed professional mixer for batches up to 50 litres and paddles up to 140 mm —extremely lightweight yet powerful, and perfect for daily use on construction sites. The integrated mixing time display ensures maximum control and consistently high mixing quality. Robustly built, Made in Germany, protected by rubber bumpers on all four corners, and equipped with outstanding ergonomics for upright, back-friendly work. With the HEXAFIX PRO quick coupling, you can change mixers efficiently and without any tools—for smooth operations and maximum productivity.

Product Features

- Full control over the mixing time thanks to the built-in mixing time display.
- The durable display is designed to withstand the demanding conditions on a construction site.
- Speed regulation via throttle switch for clean mixing without splashing.
- Smart Airflow for noise reduction.
- Tool-free exchange of paddle thanks to the HEXAFIX PRO quick coupling.

Technical specifications

Item No.	Product	Display	Power	Voltage	Speed levels	RPM	Mixing quantity
29102	XQ2 without paddle	Timer	1.200 W	230 V	1	670 1/min	50 l

Product Benefits

Precision at the touch of a button—thanks to the built-in mixing time display

Experience a new level of control when mixing: The XQ2 gives you complete control over mixing time. It offers absolute precision and repeatability in a mixer that's as light and easy to handle as an entry-level model.

Smart Airflow for noise reduction

The XQ2 also features an optimized airflow design with a specially engineered impeller that significantly reduces noise. As a result, the XQ series mixers are the quietest Collomixers ever.

HEXAFIX PRO quick coupling — faster, cleaner, longer-lasting

With the new HEXAFIX PRO quick coupling, changing paddles is even easier and more efficient. The optimized design fits even better in your hand and ensures exceptionally comfortable handling. The low-maintenance design guarantees smooth operation over the long term. At the same time, the form-fit paddle opening reliably protects against dust and dirt—ensuring maximum durability and consistently high reliability for your coupling.

Ergonomics

Save your muscle energy and let your machine do the work. All Collomix hand mixers are designed according to ergonomic principles. They help prevent hand and body fatigue. The design of the device allows you to work in an upright position, preventing back pain before it even starts.

Your job. Your mixer. Your XQ.

The XQ2 features a built-in mixing time display for consistent mixing quality—ideal for you if you want reliable results without any frills. Its lightweight, ergonomic design and HEXAFIX make it a straightforward, precise mixer for everyday use on the job site.
